MEURSAULT typically has a clear oak influence, which have led to descriptions such as "buttery" to be applied. The smell of vanilla, butter, coconut and dill are all attributes of oak-aging; in malolactic fermentation the *oenococcus oeni bacillus* converts tart malic acid (the acid in apples) to smooth lactic acid (the acid in milk), resulting in a small amount of diacetyl, and creating a rounder, more creamy-feeling wine.

BRUNELLO is often compared with the Pinot noir wines of Burgundy with its smooth tannins and ripe, fruit driven character. The high acidity of the wine allows it to pair well with food, especially grilled meat and game. Brunello di Montalcino are known for their ability to age well.

CHATEAUNEUF-DU-PAPE Appellation d'origine contrôlée (AOC) is produced from grapes grown in the commune of Châteauneuf-du-Pape and portions of the four adjoining communes in the Vaucluse. The vineyards cover an area of approximately 3,200 hectares.
